Accessibility

These checks highlight opportunities to improve the accessibility of your web app. Only a subset of accessibility issues can be automatically detected so manual testing is also encouraged.

ARIA [aria-*] attributes do not match their roles These are opportunities to improve the usage of ARIA in your application which may enhance the experience for users of assistive technology, like a screen reader. NAMES AND LABELS Buttons do not have an accessible name Links do not have a discernible name These are opportunities to improve the semantics of the controls in your application. This may enhance the experience for users of assistive technology, like a screen reader. NAVIGATION Heading elements are not in a sequentially-descending order These are opportunities to improve keyboard navigation in your application.
